
COST OPTIMIZATION SERVICE (COp-S™)

CLOUD-BASED IT FINANCIAL MANAGEMENT (ITFM) SOFTWARE

For Business, Minded IT Executives

The Cost Optimization Service (COp-S™) cloud-based software is an ITFM solution that enables you to communicate the cost, usage and the value of the technology and IT services, that improves the organizations chargeback or showback cost transparency effectiveness.

With the COp-S™ solution at your fingertips you can easily understand and communicate IT expenditures from budget to customer and business value.

Now You Can!

Achieve Greater Cost Transparency

Enable IT cost transparency across the enterprise, to help customers budget and control their use of technology and IT services.

Establish Technology and IT Services

Identify discrete technology and IT service cost and cost elements, to improve decision making.

Optimize IT Expenditures

Compare options to lower and right-size both in-house and external vendor IT service costs.

Simplify Budget Planning

Reduce time and effort by consolidating budget spreadsheets and automating labor intensive processes.

Improve IT and Business Alignment

Broaden the conversation from technology cost and ROI, to planned vs actual technology and IT service use.

Achieve Greater IT Financial Governance

Improve IT financial governance processes with specific controls and constraints per business customer.

Key Features

- Budget Planning and Forecast Reporting
- Fully customizable Cost Allocation Taxonomy
- IT Financial Cost Modeling with Rules Engine
- Scorecard and Dashboard Visualizations
- Flexible driver based “what-if” cost and customer demand scenario modeling
- Rapid implementation, and price scales to budget size
- No software development required
